

With **PHYLOGENE**,  
It's time to think out of the box...

## MICROBIOME

*15 millions years of human and microbes co-evolution*

### YOUR SAMPLES

Stools, swabs...

Characterize and understand :

- **what happens at same time** for host and micro-organisms
- the host-bacteria **interactions**
- the **effects** of the product on whole microbiome

DNA and  
PROTEIN  
EXTRACTION

**METAGENOMICS**  
PCR/SEQUENCING  
Determination of  
microbial communities  
diversity and taxonomic  
composition

**METAPROTEOMICS**  
LC-MS/MS  
Proteins  
identification and  
relative quantification

### CLAIMING POTENTIALS

**CHARACTERIZATION**  
Host-bacteria interactions, ...

**POTENTIALS**  
Microbiota preservation, diversity  
enhancement, ...

**HEALTH POTENTIAL**  
Drugs effects, diseases pathogeny,  
pathogen reduction, pathogenic  
and virulence mechanisms  
management, ...

**BIOINFORMATICS  
ANALYSIS**  
CORVALID™  
MicroXplore™  
Identification of  
interactions  
and biological effects
